

LET'S CREATE A **HEALTHY WORLD**

GOJO GREEN HYGIENE™ Solutions

For Australasia Market Only

Striving for **SUSTAINABILITY**

You want to make more sustainable choices in your work environment. You seek out opportunities to improve the health and well being of the people around you while supporting the goal of greener buildings. As you explore changes that require investments in time and technology, also consider an easy, cost-effective starting point – one that will create social, environmental and economic value for buildings and occupants.

Small Changes, **BIG RESULTS**

Small changes can make big differences. Your facility already uses hand hygiene products, so consider making a decision that encourages healthy habits, supports your green cleaning efforts and reduces impacts on the environment.

GOJO is the leading global manufacturer and marketer of skin care and hand hygiene solutions for the away-from-home market. GOJO supports your sustainability journey with formulations and packaging designed to make your hand hygiene programme a healthy decision for people, places and the environment.

GOJO GREEN HYGIENE™ Solutions, a Healthy Decision for **PEOPLE,** **PLACES** and the **ENVIRONMENT**

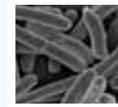

It's easy to make a real difference with the hand hygiene products you offer. Through GOJO GREEN HYGIENE™ Solutions, you'll discover environmentally responsible, scientifically advanced formulations and innovative packaging that promote the well being of people and our planet. These products support your green cleaning efforts and commitment to sustainability with features you'd expect from the industry leader.

BULK SOAP is **NOT** a healthy choice

SUSTAINABLE FORMULATIONS

These products contain ingredients made from naturally renewable resources such as plant-based ethanol and natural glycerin, coconut oil, corn oil and jojoba oil – ingredients that replenish at a more rapid pace than consumption. Sanitiser formulations also feature a natural, plant-based moisturiser that leaves skin soft and refreshed.

SUSTAINABLE PACKAGING

GOJO® and PURELL® dispenser refills are made with GOJO SMARTFLEX™ Technology. The lightweight, recyclable PET bottles provide the robust characteristics of standard HDPE bottles—but use 30% less material.

GOJO saves over 250 tonnes of plastic annually.

GOJO SANITARY SEALED™ Refills lock out germs to preserve the integrity and effectiveness of your hand hygiene products. That's because each recyclable refill is factory sealed and contains a fresh dispensing nozzle.

Bulk soap, on the other hand, is vulnerable to the risk of contamination. According to a university study¹, one in four bulk soap dispensers (those in which new soap is added to existing soap in a refillable reservoir) are contaminated with unsafe levels of bacteria. This poses an unnecessary human health risk and works against your green cleaning efforts.

That's why GOJO SANITARY SEALED Refills are your healthy choice.

THE GOJO SUSTAINABILITY JOURNEY

The GOJO Purpose, saving lives and making life better through well-being solutions, drives an ongoing commitment to sustainability. We've taken seriously our custodial responsibilities to this fragile planet since our beginnings—long before sustainability became a mainstream concept. Founders Goldie and Jerry Lippman developed and patented the world's first portion-controlled dispenser in 1952—for the sole purpose of reducing product waste. And that dispenser was made, in part, from recycled components.

The Lippmans built GOJO on a legacy of practicality, resourcefulness, perseverance and social awareness—qualities which translate to a concern for people and the environment. With office and production facilities located in Australasia, we're creating jobs and keeping our environmental footprint as small as possible.

GOJO continuously develops more innovative solutions in support of its sustainability journey—and your own.

Through tracking, improving, measuring and communicating results, GOJO has established ways of thinking and working that enhance life today while taking into account the needs of future generations.

GOJO ACTIONS HAVE DRIVEN THE FOLLOWING RESULTS:

- GOJO recycles more than 50% of its solid waste, keeping it out of landfills. Since 2007, GOJO has proudly donated nearly 180 tonnes of scrap plastic for conversion into hundreds of playgrounds.
- The state-of-the-art GOJO Distribution Centre uses advanced green building technology throughout.
- GOJO has recycled more than 3,800 tonnes of corrugated cardboard, 250 tonnes of scrap metal and 142 tonnes of office paper—just since 2007.
- Since 2009, GOJO has converted 60% of scrap soap to fuel the energy needs of other businesses. The scope of this initiative was expanded enormously in 2010, with up to 25% of all solid waste being targeted for this innovative endeavour.

BY THE YEAR 2015, GOJO WILL*:

REDUCE WATER USAGE BY 30%

GOJO recognizes water as a precious, but finite, global resource that's critical to our delivery of health and well being. That's why we've prioritized water as a target for reduction. As the National Water Commission stated, "Australians live on the driest inhabited continent in the world. Rainfall is variable and droughts are common, and water resources in many areas are scarce."

REDUCE SOLID WASTE BY 25%

GOJO is addressing the solid waste challenge by reducing, reusing and recycling. Having already recycled thousands of tonnes of scrap metal, paper and cardboard is just a start.

REDUCE GREENHOUSE GASES BY 5%

GOJO recognises the global threat that greenhouse gases pose to the environment and is constantly exploring new ways of making additional reductions.

*relative to the 2010 per use rate.

OUR 2020 SOCIAL SUSTAINABILITY GOAL:

" BRING WELL BEING TO ONE BILLION PEOPLE EVERY DAY "

As the global leader in hand hygiene, GOJO realises its biggest potential is the positive contribution it can make towards social sustainability.

Let GOJO help you create a healthy environment.

Products	Sustainability Features	Product Code	Size Description	Use Dispensers
PURELL® Hand Sanitizer Gel² Fast-acting alcohol-based hand rub that's convenient and easy to use. No water or towels needed.	<ul style="list-style-type: none"> Contains ethanol produced from 100% plant sources Conditions skin with a natural moisturiser Over 94% biodegradable (OECD 301D)⁵ Refills use GOJO SMARTFLEX™ technology Fragrance free and dye free 	5770-04-AUS00	TFX 1200 mL Refill	PURELL TFX 2720-12 (Gray) PURELL TFX 2729-12-EEU00 (White) PURELL TFX 2780-12 (Nickel) PURELL TFX 2790-12-EEU00 (Brushed Metallic)
